

premio 32 evo

Laser A-G program

PHYSIOTHERAPY

SPORTS MEDICINE

LASERTHERAPY

SOFT LASER FOR BIOSTIMULATION:

It delivers fast intense local analgesic, regenerative, muscle relaxant action without side effects, on a point or an area.

New!

Premio 32 gets stronger!

A FASTER STIMULATION!

- ✓ Constant energy delivery of **5J/min** through a super-pulsed emission mode, with bursts of very short pulses (approx. 100 ns) to avoid habituation of the cells

A DEEPER STIMULATION!

- ✓ Peak power of **100W**, to penetrate the deepest tissues

AN EXCEPTIONAL COMBINATION FOR BIOSTIMULATION!

- ✓ Nogier frequencies applied at a wavelength of **905nm** (Infrared), where the laser beam is the least absorbed by the melanin, the hemoglobin and the water.

**PLEASE CONTACT
YOUR DISTRIBUTOR FOR
FURTHER INFORMATION**

*Laser emission is invisible
Do not expose eyes to the beam
3B classification according to IEC 60825-1*

4 direct programs:

- ✓ Analgesic
- ✓ Regeneration
- ✓ Relaxation
- ✓ Nogier Frequencies

Prior to any use, carefully read the user guide
